Core Strengths

Bid & Proposal Management
O&M Tender Development
PPP / P3 Commercial Structuring
Win Strategy & Bid Governance
Lifecycle Cost & 30-yr P&L Modeling
Risk Transfer & Pricing Strategy
Concept of Operations (ConOps)
Systems Integration
Client & Stakeholder Engagement
Operational Deliverability Assurance

Bid Track Record

O&M / systems bids **20–40% below**
initial budget across multiple PPP wins
Full Design-Build P&L accountability
Global rail bids: N. America, EMEA,
APAC

Education

Executive MBA

IESE Business School, Spain (2013) —
top-3 globally (FT)

Executive MBA (Lean)

FH Ludwigshafen, Germany (2006)

MEng, Industrial Engineering (Mechanics)

Polytechnic University of Valencia
(2002)

Languages

Spanish — Native
English — Fluent

Profile

Bid and proposal leader with 20+ years in rail and transit, holding full profit-and-loss accountability for major PPP/P3 pursuits across North America, EMEA, and Asia Pacific. Built and led Bechtel's global O&M bid function, shaping win strategy, Concept of Operations, lifecycle cost models, and risk-transfer pricing on multi-billion-dollar metro, LRT, and infrastructure tenders — repeatedly delivering proposals 20–40% below initial budget. Combines this commercial bid leadership with hands-on delivery as an operator and maintainer, giving submissions credibility that wins: every assumption is grounded in what is genuinely deliverable. Strong fit for leading the O&M bid for the Dubai Blue Line, bringing direct metro-PPP operating experience (Madrid) to RATP's pursuit.

Experience

Head of Operations & Maintenance (O&M) — Global Bids

Bechtel Infrastructure | Reston, US & Toronto, Canada | Jul 2015 – Mar 2019

Established and led Bechtel's global O&M business line, driving bid pursuit and win strategy for the company's worldwide PPP and Delivery-Partner portfolio.

- **Owned all O&M proposals and rail-system bids** with full profit-and-loss accountability through the Design-Build phase, governing pricing, scope, and risk position.
- **Designed the Concept of Operations (ConOps)** for major global rail bids, defining staffing models for station operations, drivers, and control-room personnel as the basis of cost and price.
- **Built 30-year lifecycle cost models**, quantifying the P&L impact of headway, dwell time, and fleet-utilization assumptions to optimize the operating-cost case.
- **Led bid risk analysis** on new pursuits and developed Bechtel's O&M business plan and long-term strategy across North America, EMEA, and Asia Pacific.
- Recruited and trained the multidisciplinary bid team — including operational rail-modeling experts — to support PPP and Delivery-Partner pursuits.

Selected bid outcomes

- Rail systems integration & T&C proposal (DBJV, Ottawa LRT PPP) — **30% below** initial budget.
- O&M & rail-systems bid (OMJV, Finch LRT PPP) — **20% below** initial budget.
- Bridge tolling, intelligent traffic control & health-monitoring bid (Gordie Howe Bridge PPP) — **40% below** initial budget, with O&M also under estimate.
- Edmonton Valley Line LRT (P3, 30-yr O&M) — bid through to O&M company mobilization as a member of the execution Management Committee.

Senior Consultant — Head of Fixed Assets

Boxfish Infrastructure Group Inc. | Toronto, Canada | Jul 2019 – Jan 2024

- **Delivered a maintenance bid 25% below estimate** by re-engineering the maintenance risk-transfer model for the concession.
- Developed the asset-management plan for a **\$20B network upgrade** (OnCorr), ensuring assets met regulatory codes ahead of operational handover.
- Led vehicle–infrastructure integration on the multi-billion-dollar Eglinton Crosstown, mediating technical clashes between the fleet manufacturer and the construction JV.
- Worked with the incoming operator (Deutsche Bahn) to validate ConOps and timetable, engineering Union Station capacity upgrades (24m high-speed switches, double berthing) to clear the network's primary bottleneck.

General Manager — Eglinton Crosstown LRT (CTSM)

ACS Infrastructure | Toronto, Canada | Jan 2024 – Present

Delivering, in live operations, the O&M model that PPP bids promise — validating bid assumptions against real SLA performance.

- Accountable for **Service Availability against ~98% SLA targets**, managing the fleet/infrastructure performance interface that underpins any O&M bid case.
- Led the Trial Running & Operational Readiness strategy and the Shadow Operations handover of 25 stations and 19km of track from construction to live status.
- Developed failure-recovery SOPs and chaired the Safety Review Board, leading root-cause investigations to preserve the Safety Case and regulatory compliance.
- Manage the contractual relationship with Metrolinx, holding the line on SLAs and operational KPIs.

Maintenance Director — Metro Ligero Oeste (Madrid Metro PPP)

Metro Ligero Oeste S.A. | Pozuelo de Alarcón, Spain | Sep 2006 – Jul 2015

Led the maintenance and rehabilitation phase of a light-rail PPP concession within the Madrid metro network.

- **Cut the initial infrastructure maintenance budget 35%** via a self-performing strategy, generating significant concession profit.
- Delivered **99.5% Service Availability** across ML2/ML3, managing daily fleet output to peak-hour headways.
- Reduced service-affecting incidents 30% through a predictive-intervention strategy and the energy bill 30% via tunnel/street lighting and ventilation control.
